

Macromolecular Materials 2011

*Macromolecular innovation for sustainability
and materials performance*

Dates: *January 8 – 9, 2011*

Location: *Ventura, CA
Four Points Sheraton*

Abstracts Due December 18, 2010

The Macromolecular Materials GRS aims to establish an environment solely for young researchers, with the organizers and the presenters, composed entirely of graduate students and post-doctoral fellows. As with past Macromolecular Materials GRS, the topics of this 2-day meeting will be interdisciplinary and focused on emerging aspects of polymer synthesis and design of novel materials, spanning the areas of polymer chemistry, physics, and engineering. The unique and intimate format of the GRS and subsequent GRC provides an opportunity for young scientists to discuss cutting edge research and form lasting contacts with others at the forefront of the field.

Apply Online: http://grc.org/programs.aspx?year=2011&program=grs_macro

***GRS participants are encouraged to attend the
subsequent Gordon Research Conference, January 9 – 14, 2011***
